

Application Number 10/829,133  
Amendment dated November 30, 2005  
Reply to Office Action of October 6, 2005

REMARKS

Claims 1-16 are pending in the present application. Applicant notes with appreciation that the Office Action indicates that claims 1-16 are allowed.

FIG. 1 of the drawings is objected to for not including a "PRIOR ART" label. FIG. 1 is amended above to include the legend "PRIOR ART," as suggested in the Office Action at page 2, paragraph 1. Reconsideration of the objection to the drawings is therefore respectfully requested.

Claims 5, 6, 8, 11, and 12 are objected to for informalities stated in the Office Action at page 2, paragraphs 2 and 3. The claims are amended in a manner that is believed to overcome the objections. Specifically, claims 5, 6, 11, and 12 are amended such that the issues related to antecedent basis are addressed. Claim 8 is amended to be correctly dependent on claim 7. Claim 5 is further amended to clarify that the first control signal generating circuit comprises a third PMOS transistor, a fourth PMOS transistor, and a fifth NMOS transistor. Claim 6 is further amended to clarify that the first control signal generating circuit comprises a third PMOS transistor, a fourth PMOS transistor, and a fifth NMOS transistor. Claim 11 is further amended to clarify that the first control signal generating circuit comprises a third NMOS transistor, a fourth NMOS transistor, and a fifth PMOS transistor. Entry of the amendments to claims 5, 6, 8, 11, and 12 is respectfully requested.

In addition, claim 10 is amended to clarify that the source of a second NMOS transistor is supplied with a ground voltage. This feature is illustrated at least at Figure 5 of the present specification. In this example, a bit-line sense amplifier 530 comprises a second NMOS transistor MN1. The source of the second NMOS transistor MN1 is supplied with a ground voltage VSS. Accordingly, entry to the amendment of claim 10 is respectfully requested.
